11 OCTOBER 2007 - 9/11 SCHOLAR FILES "QUI TAM" LAWSUIT AGAINST NIST

9/11 Scholar files "Qui Tam" lawsuit again

ABSTRACT: A prominent member of Scholars for 9/11 Truth, Dr. Judy Wood, has filed a Qui Tam lawsuit against several contractors hired by the National Institute for Standards and Technology (NIST) to provide technical assistance to NIST alleging fraud performed concerning the official investigation of why and how the World Trade Center complex was destroyed on 9/11/01. Dr. Judy Wood, a professor of mechanical engineering at Clemson University, has amassed evidence about the destruction of the World Trade Center in her suit, which has now been unsealed by the Court and is available to the public.

http://www.opednews.com/articles/opedne_jim_fetz_071011_9_2f11_scholar_files_22.htm

Madison, WI (OpEdNews) October 11, 2007 – According to James H. Fetzer, founder of Scholars for 9/11 Truth, on September 11, 2007 after the sixth anniversary of the attacks on the World Trade Center (WTC), Federal Judge George B. Daniels of the Southern District of New York signed a court order "unsealing" a 9/11 complaint filed by Dr. Judy Wood against the National Institute of Standards and Technology (NIST) on September 25, 2007. "This may prove to be a crucial turning point in exposing the official cover-up of what actually happened on that fateful day," said James H. Fetzer.

The complaint alleges that contractors hired by the National Institute of Standards and Technology (NIST), an agency of the U.S. Commerce Department, violated the so-called False Claims Act in their work originally intended to "determine why and how WTC 1 and WTC 2 collapsed following the initial impacts of the aircraft." Dr. Wood is suing on behalf of the United States of America because the U. S. Attorney for the Southern District of New York, which represents "the government," declined to intervene in the case, a so-called "Qui Tam" lawsuit.

With the case unsealed, steps in the litigation now can be reported to the public in the same manner as any lawsuit pending in federal court, according to Jerry V. Leaphart, Attorney at Law, who is representing Dr. Wood in these proceedings. Leaphart, who has been practicing law in New York, New Jersey, and Connecticut, recognized that the situation was ripe for a Qui Tam suit in light of Dr. Wood's report that her findings contradict the official NIST report.

According to Leaphart, Qui Tam is a legal provision under the False Claims Act (31 U.S.C. #3729 et seq.) that allows private those who are known as "whistleblowers," who possess knowledge of frauds committed against the United States to bring suit. "When the nation won't act on its own behalf," he added, "Qui Tam provides the means for citizens to compel the government to fulfill its duties and obligations under the law."

"NIST was hanging out with the wrong crowd," said Dr. Wood. "Apparently the people hired to do the work of figuring out how the Twin Towers collapsed disappeared convinced NIST to focus on something else. NIST admitted to me in writing that it deliberately did not investigate the cause of the collapse, only the unraveling of the WTC," she said. In its letter of July 27, 2007 to Wood, NIST acknowledged, "NIST only investigated the facts leading up to the initiation of the collapses of the WTC towers, not the collapses themselves."

Dr. Wood holds degrees in Civil Engineering, Engineering Mechanics, and Materials Engineering Science. Fetzer added, "She is an assistant professor in the Department of Mechanical Engineering at Clemson University and is arguably the best qualified engineer in the world. I know of no one else whose qualifications come close to matching hers."

Dr. Wood is well known in the 9/11 truth movement for alleging fraud and requesting correction of the official report prepared by NIST. She presented compelling evidence that the Twin Towers were destroyed by Directed Energy Weapons (DEW).

She has also discovered that companies heavily invested in developing and manufacturing such black technology were also involved in the NIST project. They appear to have ignored evidence of DEW all around them, instead using their expertise to cover up the key players.

Although NIST declined to correct NCSTAR 1 as demanded by Dr. Wood, NIST did respond in part by providing a specific definition of what is meant by the word "collapse" in its original report, NCSTAR 1, namely:

"a falling in, loss of shape, or reduction to flattened form or rubble of a structure."

This definition, however, turns out to be at odds with the basic premise of NCSTAR 1, insofar as the NIST never actually states that the Twin Towers fell within the scope of this novel definition. "That is fraud," declared Dr. Wood. [http://drjudywood.com/articles/NIST/Qui_Tam.html]

"Indeed," said Fetzer, who recently retired as a professor of philosophy after 35 years of college teaching, "that definition would not be consistent with the destruction of the building by means of a nuclear explosion, which flattened it and turned it to rubble. NIST claims that it happened."

Dr. Wood's federal Qui Tam case asserts that the corporate and individual defendants committed actionable fraud under the False Claims Act. Her lawsuit seeks reimbursement of monies paid, penalties and interest.

"The most shocking claim," Attorney Leaphart has observed, "may be that some of the defendants include those actually involved in the development and manufacture of directed energy weapons and the development of covert psychological operations, which Wood claims was a factor in the events of 9/11." Her complaint states, in part:

"[The] defendants...committed fraud in seeking to have NCSTAR 1 deceive the public into not recognizing that WTC1, 2 could not possibly have been destroyed in the manner seen absent the use of DEW. Some of the defendants knew as much; other defendants did not know or if they did not, they should have known. To the extent they did not know, such ignorance was willful, intentional and acted in violation of the False Claims Act."

Leaphart's office has already served the defendants with notice of the complaint that has been filed against them. Defendant Applied Research Associates (ARA), Science Applications International Corporation (SAIC), and Underwriters Laboratories, "will be very interesting," said Fetzer. "I predict you'll be hearing more about it. We are burrowing deeper and deeper into the story."

"Dr. Judy Wood (with degrees in Civil Engineering, Engineering Mechanics, and Materials Engineering Science), widely acknowledged as the leading proponent of the theory that Directed Energy Weapons (DEW) were used to destroy the World Trade Center (WTC) complex, has filed a Request for Correction under the Data Quality Act with the National Institute of Standards and Technology (NIST), located in Gaithersburg, MD.

Dr. Wood is represented in this effort by Attorney Jerry Leaphart, a Connecticut-based trial lawyer, who states that NIST now has 60 days to respond to the RFC. After that, an appeal can be taken and/or other legal action may then follow.

Leaphart further states that Dr. Wood knows that the implications of her theory that DEW were used to destroy the WTC complex shatter certain key beliefs that Americans as a whole cherish and hold dear. Her theory has generated a lot of interest and commentary within the 9/11 Truth Movement that relies primarily upon the Internet as its media source. Mainstream print and broadcast media do not cover the 9/11 Truth Movement, but may need to take heed of this administrative action filed by Dr. Wood, according to

Attorney Leaphart.

Leaphart said that to his knowledge, only three RFCs concerning NIST's WTC report have been filed to date. One by Dr. Morgan Reynolds, another by Edward F. Haas and the one filed by Dr. Wood. All three are currently pending.

The 43 page RFC filed by Wood asserts that the basic integrity of NCSTAR 1 is lacking because, by its own admission, it did not investigate the actual destruction of the World Trade Center Towers.

NCSTAR 1 admits:

"The focus of the investigation was on the sequence of events from the instance of aircraft impact to the initiation of collapse for each tower. For brevity in this report, this sequence is referred to as the "probable collapse sequence," although it does not actually include the structural behavior of the tower after the conditions for collapse initiation were reached and collapse became inevitable." [See NCSTAR 1, pgs xxxvii, footnote 2 and/or 82, footnote 13]...

Thus, to this day, Americans have not been given any explanation whatsoever for the destruction of the WTC complex that comports with information and quality standards.

In contrast, Dr. Wood's RFC contains a stunning array of visual evidence confirming highly unusual energy effects seen by all as the twin towers were almost instantaneously destroyed in less time than it would take a billiard ball to hit the ground if dropped from the height of the twin towers.

That fact is assessed on the basis of the two other laws of physics in Wood's RFC, thus confirming its scientific rigor. Wood also points to other compelling evidence that NIST ignored. Wood's RFC shows visual evidence of unusual and unexplained blast effects on vehicles parked blocks away from the complex. Wood also demonstrates unexplained visual damage in the form of perpendicular gouges in WTC 4,5,6 and the near disappearance of WTC 3, all of which remain unexplained by NIST to this day. Wood goes further and points out that the incredible amount of dust resulting from the visible process of steel disintegrating before our very eyes all point to the use of directed energy weapons. One other element of Wood's proof is the almost complete lack of even a rubble pile at the WTC complex. Wood asks: Where did it go?

Added to all of that is the fact that whatever the energy and heat source was, it had no effect upon paper that was seen floating everywhere and not burning very much, if at all.

Dr. Wood's RFC demonstrates all of the above mentioned effects in its 43 pages of text and pictorial proof. The combined effects of gravity, jet fuel (a form of kerosene) and plane damage could not possibly have caused the massive destruction that occurred on September 11, 2001, in New York City, according to Dr. Wood. The wonder of it all is that more engineers and scientists have not come forward to challenge the woeful, scientific inadequacies of the official explanation.

Dr. Wood invites her peers and colleagues to set aside their emotional attachments and to view the evidence objectively. Then and only then can America come to grips with what happened on 9/11/01, according to Dr. Wood.

Two Live shots vs Two Fake 911 Hoax Videos	Zooming In on The 911 Hoax: Contrasting Four Shots with Video Analysis
0:24 URL Video by "bsregistration " (LiveVideo) "Can we all agree that both shots on the right hand side are fake? If not, for those of you who think an airplane crashed into the south tower, how more... many planes crashed into it? Pick one that you think is the real UA 175. Then most of the other 36 videos are fake, including all of the ones that they aired on TV. If you think both videos on the right are real, you must have rather serious mental problems. All 4 videos are in sync and run at the exact same speed." Also, video: Reading from the same script 911 OCTOPUS 8 - Unmasking the Media Perps	4:52 URL Video by "bsregistration "0 (LiveVideo) "The two live shots on top appear to show a missile attacking the South Tower of the World Trade Center. Whatever coming in is much smaller than UA more... 175 should be and looks nothing like a plane. The two shots on the bottom are fake. In the under the bridge shot the "black blob" goes in front of a building it should be behind for a couple of frames, and then is corrected. The fireball shows signs of tampering. The shot in the lower right appears to be a screencap of a bird which has been pasted into the image, and moves across much faster than the missile in the live shot. It's a fake."

History Repeats.

One picture of the inside of WTC6 and the other is the Murrah Building in OKC. Can you tell which is which? (Hint: one of them has a wheatchex at the bottom.)

Seismic Evidence

"A time comes when silence is betrayal." - Martin Luther King
 "All that is necessary for evil to succeed is that good men do nothing." -Edmond Burke
 "The world is a dangerous place, not because of those who do evil, but because of those who look on and do nothing." - Albert Einstein

[TOP](#)

Martin Luther King

A time comes when silence is betrayal.

"These are the times for real choices and not false ones. We are at the moment when our lives must be placed on the line if our nation is to survive its own folly. Every man of humane convictions must decide on the protest that best suits his convictions, but we must all protest."

30 January 2007
Daphane Wysham (Institute for Policy Studies) presents the serious status of global warming. Judy Wood offers evidence that Directed-Energy Weapons (DEWs) likely destroyed the World Trade Towers on 9/11/01. John Bloomer explains how the same Directed-Energy Weapons can reverse Global Warming. Gaining control of the orbital Beam apparatus for constructive as opposed to destructive use is discussed by Ambrose I. Lane and his three guests. Scholars file challenges to 9/11 NIST reports Submissions may shatter the cover-up, founder declares

Madison, WI (PRWEB) March 30, 2007 – Some members of Scholars for 9/11 Truth, a non-partisan organization of students, experts and scholars dedicated to exposing falsehoods and revealing truths about 9/11, have filed complaints against the National Institute of Standards and Technology for legal defects in its studies of events of 9/11 involving the Twin Towers and Building 7. James H. Fetzer, the society's founder, believes these actions have the potential to break the back of the cover-up that has enveloped these events.

"It would be nice if the government would tell us the truth about our own history," Fetzer said. "But all we get from the President, the Vice President, the Secretary of State and former Secretary of Defense is a 'song and dance' that keeps the American people in ignorance." The complaints have been filed by Ed Haas, who edits The Muckraker Report; Morgan Reynolds, past Chief Economist in the Department of Labor in the Bush administration; and Judy Wood, former professor of mechanical engineering at Clemson University. Reynolds and Wood are both members of the society.

The complaints, which are archived and available to the public at www.ocio.os.doc.gov/ITPolicyandPrograms/Information_Quality/PROD01_002619, fall into three categories. The complaint by Ed Haas concerns claims that NIST has advanced asserting that it has found "no evidence of a blast or controlled demolition event" in relation to Building 7. Haas alleges that this is false and misleading insofar as NIST has never looked for evidence of this kind. Moreover, NIST denies having found any "corroborating evidence" supporting the hypothesis that the building was brought down by controlled demolition, which is inconsistent with evidence it acknowledges.

Indeed, in his complaint, Haas observes that the gross features of the collapse of Building 7—a 6.6 second, complete, symmetrical, and total collapse—qualify as evidence of controlled demolition of that building, which contradicts NIST's affirmations. In a second complaint, Haas observes that conflicts of interest affect using many of the same scientists, experts, subcontractors, and others who were responsible for research on the Twin Towers to conduct research on Building 7 as well, which tends to taint their objectivity.

"Building 7 has been of special interest lately," Fetzer remarked, "since archival footage from the BBC has been discovered, where a female reporter is explaining that Building 7 has also collapsed." The problem is that the building only collapsed at 5:20 PM, while she is reporting it at 4:57 PM, which is 23 minutes too soon. "You can find a dozen articles about it on 911scholars.org, which is the society's web site. You can even see Building 7 clearly standing in the background over her left shoulder in these news video clips, which raises disturbing questions about the media in all of this."

The second complaint, which has been filed by Morgan Reynolds, disputes NIST's explanations of the jetliner-shaped holes in the Twin Towers. According to NIST, the North Tower (WTC-1) was hit by Flight AA 11, a Boeing 767, traveling at an estimated 443 mph, yet its tail section disappears within 0.25 seconds. And it claims that the South Tower (WTC-2) was hit by Flight UA 175, another Boeing 767, flying at an estimated speed of 542 mph, where its tail section disappears into the building in approximately 0.20 seconds.

Reynolds observes that the planes are 159 feet in length, which means that, on the NIST account, Flight AA 11 lost only 2% of its speed in despite massive resistance from a steel/concrete building. Similarly for Flight UA 175, the airspeed of which did not decline in spite of its impact with steel walls and concrete floors, as well as the dense steel core consisting of 47 columns. The complaint contends that real jetliners would have been dramatically slowed by the impact, which implies that the NIST report is not only factually wrong but also physically impossible in violating physical laws.

"Morgan poses a substantial number of anomalies that NIST will be hard pressed to explain," Fetzer said. "But the greatest challenge to its scientific integrity is posed by the complaint filed by Judy Wood, which is a veritable tour de force." While the documents filed by Haas and Reynolds run less than ten pages in length, the one filed by Wood runs forty-three pages, including photographs and other supporting evidence. "It is a powerful critique that demonstrates the government has completely and utterly failed to explain what happened to the World Trade Center on that tragic and fateful day."

Fetzer characterizes Dr. Wood, who has degrees in civil engineering, engineering mechanics, and materials engineering science, as the leading expert on technical aspects of the destruction of the World Trade Center. "There are experts in many areas of science and of engineering studying 9/11," he explained, "but she has degrees that are centrally focused on critical areas in which competence is required to begin to understand what happened on 9/11. No one else in the 9/11 community comes close to her level of expertise."

Her complaint, technically, Request for Correction, like the others, asserts that the basic integrity of NIST's report, called NCSTAR 1, is lacking because, by its own admission, NIST did not investigate the actual destruction of the World Trade Center Towers: "The focus of the investigation was on the sequence of events from the instance of aircraft impact to the initiation of collapse for each tower." This means that the NIST report does not actually include the collapse behavior of the towers after the conditions for their initiation were realized, which NIST refers to as "the probable collapse sequence."

"NIST, of course, claims that it was the impact of the aircraft and the jet-fuel based fires, which caused the steel to weaken and bring about a collapse," Fetzer said. "But the buildings were designed to withstand such occurrences and the steel had been certified by UL to 2,000 degrees Fahrenheit for several hours without weakening. The fires only burned around 500 degrees for less than an hour (in the case of WTC-2) and an hour-and-a-half (in the case of WTC-1), so NIST really doesn't even reach the point at which a 'collapse' of any kind would be 'initiated.' The situation is quite remarkable."

Thus, to this day, Americans have not been given any explanation whatsoever for the destruction of the WTC complex that comports with information and quality standards. In contrast, Dr. Wood's RFC contains a stunning array of visual evidence that confirms highly unusual energy effects seen by all as the Twin Towers were almost instantaneously destroyed in less time than it would take a billiard ball to hit the ground if dropped from the height of 110 stories, a result she demonstrates in relation to the law of falling bodies.

Wood also points out other compelling evidence that NIST ignored, including visual evidence of unusual and unexplained devastation to vehicles parked blocks away from the WTC complex, including some with disintegrated engine blocks but unexploded gas tanks. And she notes the peculiar damage of perpendicular gouges in WTC-3, WTC-4, WTC-5, and WTC-6, as well as other distinctive effects, such as cylindrical holes in these buildings and even in the street, which remain unexplained by NIST to this day. "These outcomes appear to be inexplicable if only conventional explosives, much less fires, were involved," Fetzer said. "Cars burned, paper did not."

Indeed, Wood goes further and points out that the huge quantity of dust resulting from the visible process of steel disintegration, some of which was captured on film, combined with these other effects suggest the probable use of high-tech, directed energy weapons. Another element of Wood's proof is the almost complete lack of even a rubble pile at the WTC complex. "Where did it go?", she asks. Whatever the source of energy and heat may have been, it had no effect upon massive quantities of paper floating around the city.

Jerry Leaphart, a Connecticut-based trial lawyer, who is also a member of Scholars, represents the complainants in this effort. Leaphart states that NIST now has 60 days to respond to the RFC. After that, an appeal can be taken or other legal action could be pursued. "Anyone with a serious interest in what happened at the World Trade Center has to read Wood's complaint," Fetzer added. "It is a stunning indictment of the NIST's failure to come to grips with the problem. In my opinion, these submissions have the potential to shatter the cover-up in one of the greatest murder mysteries in history. We are all indebted to them for doing this."

11 OCTOBER 2007 - 9/11 SCHOLAR FILES "QUI TAM" LAWSUIT AGAINST NIST

9/11 Scholar files "Qui Tam" lawsuit against NIST

ABSTRACT: A prominent member of Scholars for 9/11 Truth, Dr. Judy Wood, has filed a Qui Tam lawsuit against several companies that were contracted by the National Institute for Standards and Technology (NIST) to provide technical assistance to NIST alleging fraud in the work they performed concerning the official investigation of why and how the World Trade Center complex was destroyed on 9/11/01. Dr. Wood, formerly a professor of mechanical engineering at Clemson University, has amassed evidence about the destruction of the World Trade Center in support of her suit, which has now been unsealed by the Court and is available to the public.

http://www.opednews.com/articles/opedne_jim_fetzer_071011_9_2f11_scholar_files_22.htm

Madison, WI (OpEdNews) October 11, 2007 – According to James H. Fetzer, founder of Scholars for 9/11 Truth, on September 12, 2007, the day after the sixth anniversary of the attacks on the World Trade Center (WTC), Federal Judge George B. Daniels of the Southern District of New York signed a court order "unsealing" a 9/11 complaint filed by Dr. Judy Wood against the National Institute of Standards and Technology on April 25, 2007. "This may prove to be a crucial turning point in exposing the official cover-up of what actually happened on that tragic day," observed Fetzer.

The complaint alleges that contractors hired by the National Institute of Standards and Technology (NIST), an agency of the U.S. Department of Commerce, violated the so-called False Claims Act in their work originally intended to "determine why and how WTC 1 and WTC 2 collapsed following the initial impacts of the aircraft." Dr. Wood is suing on behalf of the United States of America because the U. S. Attorney for the Southern District of New York, which represents "the government," declined to intervene in the case, a so-called "Qui Tam" lawsuit, Fetzer said.

With the case unsealed, steps in the litigation now can be reported to the public in the same manner as any lawsuit pending in a federal court, according to Jerry V. Leaphart, Attorney at Law, who is representing Dr. Wood in these proceedings. Leaphart, who has been admitted to the bar in New York, New Jersey, and Connecticut, recognized that the situation was ripe for a Qui Tam suit in light of Dr. Wood's research, which contradicts the official NIST report.

According to Leaphart, Qui Tam is a legal provision under the False Claims Act (31 U.S.C. #3729 et seq.) that allows private persons, including those who are known as "whistleblowers," who possess knowledge of frauds committed against the United States to bring suits on its behalf. "When the nation won't act on its own behalf," he added, "Qui Tam provides the means for citizens to compel the government to fulfill its own duties and obligations under the law."

"NIST was hanging out with the wrong crowd," said Dr. Wood. "Apparently the people hired to do the work of figuring out how the Twin Towers disappeared convinced NIST to focus on something else. NIST admitted to me in writing that it deliberately did not investigate the actual unraveling of the WTC," she said. In its letter of July 27, 2007 to Wood, NIST acknowledged, "NIST only investigated the factors leading to the initiation of the collapses of the WTC towers, not the collapses themselves."

Dr. Wood holds degrees in Civil Engineering, Engineering Mechanics, and Materials Engineering Science. Fetzer added, "She is a former assistant

Scholars for 9/11 Truth - 11 OCTOBER 2007 - 9/11 SCHOLAR FI... http://twilightpines.com//index.php?option=com_content&task=vie...

professor in the Department of Mechanical Engineering at Clemson University and is arguably the best qualified 9/11 researcher in the world. I know of no one else whose qualifications come close to matching hers."

Dr. Wood is well known in the 9/11 truth movement for alleging fraud and requesting correction of the official report prepared by NIST. In her recent Appeal of her Request for Correction (RFC), Wood presented compelling evidence that the Twin Towers were destroyed by Directed Energy Weapons (DEW).

She has also discovered that companies heavily invested in developing and manufacturing such black technology were also hired to work on the NIST project. They appear to have ignored evidence of DEW all around them, instead using their expertise to cover up the kind of weaponry employed.

Although NIST declined to correct NCSTAR 1 as demanded by Dr. Wood, NIST did respond in part by providing a specific definition of what it meant by the word "collapse" in its original report, NCSTAR 1, namely:

"a falling in, loss of shape, or reduction to flattened form or rubble of a structure."

This definition, however, turns out to be at odds with the basic premise of NCSTAR 1, insofar as the NIST never actually studied the events that fall within the scope of this novel definition. "That is fraud," declared Dr. Wood. [http://drjudywood.com/articles/NIST/Qui_Tam_Wood.html]

"Indeed," said Fetzer, who recently retired as a professor of philosophy after 35 years of college teaching, "that definition would even be consistent with the destruction of the building by means of a nuclear explosion, which flattened it and turned it to rubble. NIST did not explain how it happened."

Dr. Wood's federal Qui Tam case asserts that the corporate and individual defendants committed actionable fraud under the False Claims Act. Her lawsuit seeks reimbursement of monies paid, penalties and interest.

"The most shocking claim," Attorney Leaphart has observed, "may be that some of the defendants include those actually involved in development and manufacture of directed energy weapons and the development of covert psychological operations, which Wood claims were key ingredients in the events of 9/11." Her complaint states, in part:

"[The] defendants...committed fraud in seeking to have NCSTAR 1 deceive the public into not recognizing that WTC1, 2 could not reasonably or possibly have been destroyed in the manner seen absent the use of DEW. Some of the defendants knew as much; other defendants either knew or if they did not, they should have known. To the extent they did not know, such ignorance was willful, intentional and actionable under the False Claims Act."

Leaphart's office has already served the defendants with notice of the complaint that has been filed against them. Defendants named include Applied Research Associates (ARA), Science Applications International Corporation (SAIC), and Underwriters Laboratories, among others. "This should be very interesting," said Fetzer. "I predict you'll be hearing more about it. We are burrowing deeper and deeper into the reality of 9/11."
